About me

My name is Milenko Castillo, I'm 31 years old, I'm from Santiago, Chile and I studied Software Engineering. I'm a passionate, self-taught developer committed to delivering a product of high standards. My goal is to contribute to the industry my dedication and enthusiasm for continuous learning. Am excited for the opportunity to work on a new team and I I'd love to work with you.

I've completed several courses within and outside the area, and I'd love to keep on perfecting my skills with technologies throughout the web development spectrum. In the near future, I'd like to learn *Go* and *SvelteKit*, but meanwhile I'm perfecting myself in Python and Java for the backend.

Education

2019 — **Software Engineering**
Universidad Técnica Federico Santa María, Santiago, Chile

Experience

2020 — 2 months — **Internship, Banco de Chile**
Internship for the web development area, software architecture support and back-end web development. I made the project's architecture model so we could integrate it into the rest of the company and I also developed medium complexity tasks on Spring Boot. Experience in Enterprise Architect, Spring Framework/Boot, Java and agile work under Scrum.

2017 — 6 months — **Internship, Telefónica I+D**
Internship developing a Python kernel. I developed a Python kernel to be able to run Pig within Jupyter Notebook more straightforward. Experience in Python, Jupyter, Pig, ANTLR4 and Azure.

2013 — January — **Technical Support, Alfacom**
Cable management and network and terminal configurations at the CELAC and CELAC-UE event.

Courses and Certificates

2023 — **"Desarrollo de Aplicaciones Full-Stack Python"** *(EduTecno / Talento Digital)*
Programming bootcamp covering HTML, CSS, Bootstrap, Javascript, Python and Django.

2023 — **"Vue - The Complete Guide"** *(Udemy)*
Vue 3 course covering script setup, pinia and firebase.

2023 — **"Curso de Docker"** *(Codigo Facilito)*
Basic Docker course.

2023 — **"Front End Development Libraries"** *(freeCodeCamp)*
Course covering Bootstrap, React and Redux.

2023 — **"Back End Development and APIs"** *(freeCodeCamp)*
Course covering Node, Express and MongoDB.

2023 — **"Unity Junior Programmer Pathway"** *(Unity)*
Advanced course covering OOP and C#.

2023 — **"Javascript Algorithms and Data Structures"** *(freeCodeCamp)*
Basic Javascript course.

2022 — **"Unity Essentials Pathway"** *(Unity)*
Basic Unity course.

2022 — **"Responsive Web Design"** *(freeCodeCamp)*
Basic HTML and CSS course.

2018 — **"Bootcamp Full-Stack"** *(Desafío Latam)*
Programming bootcamp covering fullstack development with Ruby on Rails.

Technologies

The technologies I'm most comfortable working with are:

`Javascript ES6`   `Vue`   `Python 3`   `Django`

Other Technologies

`Java` `React` `PostgreSQL` `MongoDB` `Firebase` `Node`
`Vite` `Bootstrap` `Linux` `Windows` `C` `C#` `LaTeX`

Soft Skills

`Service-Oriented` `Detail-Oriented` `Problem Solving` `Research` `Creativity`

Languages

`Native Spanish`
`English C2`
